## The Reformers and Their Reformations

Carl R. Trueman and Eunjin Kim

### ABSTRACT

The Reformation of the sixteenth century took various forms and exhibited numerous emphases in the places in which it took root. While the work of Luther in Germany was foundational to all that happened, the Reformations in Switzerland, Geneva, England, and Scotland each shape a unique shape as Protestantism established itself in different social, economic and political circumstances. Certain themes remained constant such as the need for the church to be regulated by Scripture, but considerable diversity emerged on matters of the sacraments, church organization, and the relationship between the church and the civil magistrate.
