

Searching for journal articles on ATLA Databases Gamble Guides

Please note:

Staff and student members of the Gamble Library have access to **Atla Religion Database with AtlaSerials PLUS**. These give access to thousands of **journal articles** and indexed records (e.g. articles in edited books – Festschriften, symposia and conference proceedings etc.), which can easily be searched.

Go to the 'Digital resources from the Gamble Library' section of your module shell and click on the ATLAS PLUS icon. You will be prompted to enter your Union Theological College email address and password. You will then be redirected to the ATLA landing page. (Alternatively you can access ATLA using the PDF Gamble Guide listing all electronic resources which is emailed out by the Librarian).

Click on 'Choose Databases.'

Select 'Atla Religion Database with ATLASerials PLUS' only and click 'OK.'

Searching: Atla Religion Database with AtlaSerials, [Show all](#) | [Choose Databases](#)

Search

?

[Search Options](#) Basic Search [Advanced Search](#) [Search History](#)

Basic searches will return many results which may or may not be relevant. It is therefore advisable to carry out advanced searches, rather than basic searches. (See later in this guide for advanced search tips). Basic search results can however be refined, according to your needs, using the column on the left of the webpage.

The screenshot shows the EBSCOhost search results page for the query 'Jesus Gospels'. The left sidebar, titled 'Refine Results', has a red box highlighting the 'Limit To' section. In this section, the following options are checked: 'Full Text', 'Scholarly (Peer Reviewed) Journals', and 'Academic Journals'. The 'From' and 'To' date fields are set to '1905' and '2021' respectively. The main results area shows three articles, each with a 'PDF Full Text' link. The first article is 'Jesus' Questions in the Gospel of Matthew: Promoting Critical Thinking Skills' by Dami, Zummy Anselmus, Alexander, Ferdinand, Manafe, Yanjumsby Yeverson. The second article is 'Dating Ancient Egyptian Papyri through Raman Spectroscopy: Concept and Application to the Fragments of the Gospel of Jesus' Wife and the Gospel of John' by Goler, Sarah, Yardley, James T, Ratzan, David M, Bagnall, Roger S (Roger Shaler), Hagadorn, Alexis, McInerney, James. The third article is 'When Jesus Speaks Aramaic in the Greek Gospels' by Morrison, Craig E.

'Full text,' 'Scholarly (Peer Reviewed) Journals' and 'Academic Journals' have been selected, by clicking the relevant buttons, in the search above.

You can choose articles from a certain date (more recent articles are usually preferred by lecturers) by moving the sliding bar along according to your preferences, or typing in your preferred dates. Your results will update automatically:

This screenshot is similar to the previous one, but the 'From' and 'To' date fields in the 'Refine Results' sidebar are now set to '2000' and '2021' respectively. The 'Search Results' count has changed from 133 to 79. The three articles shown in the main results area are the same as in the previous screenshot.

You can also refine by subject and publication etc. by clicking on these words to reveal more options, then clicking into the appropriate boxes to update the results list.

Advanced Searching

Click 'Advanced search' under the search box on the basic search page to go to the advanced search.

The screenshot shows the top navigation bar with links: New Search, Publications, Scriptures, Dictionaries, More, Sign In, Folder, Preferences, Languages, Help, Exit. Below the navigation bar is a search box with the text "Enter any words to find books, journals and more." and a green "Search" button. Below the search box are links: Search Options, Basic Search, Advanced Search (highlighted with a red box), and Search History.

Or if you have just done a basic search, click on 'Advanced search' under the basic search box.

The screenshot shows the search results page. The top navigation bar is the same as the previous screenshot. Below the navigation bar is a search box with the text "Jesus Gospels" and a green "Search" button. Below the search box are links: Basic Search, Advanced Search (highlighted with a red box), and Search History. The search results are displayed below the search box. The first result is "1. Jesus' Questions in the Gospel of Matthew: Promoting Critical Thinking Skills". The result includes the author "By: Dami, Zummy Anselmus; Alexander, Ferdinand; Manafe, Yanjumsby Yeverson. Source: Christian Education Journal, 18 no 1 Apr 2021, p 89-111. Publication Type: Article" and the subjects "Subjects: Jesus Christ -- Teachings; Bible . Matthew--Criticism, interpretation; Questioning in the Bible; Critical thinking; Qualitative research; Comprehension". The result also includes a "PDF Full Text" link (735245 bytes).

This will bring up the advanced search page.

The screenshot shows the advanced search page. The top navigation bar is the same as the previous screenshots. Below the navigation bar is a search box with the text "Enter any words to find books, journals and more." and a green "Search" button. Below the search box are links: Basic Search, Advanced Search, and Search History. The search box is divided into three sections: "AND", "AND", and "AND". Each section has a "Select a Field (optional)" dropdown menu. Below the search box are links: Basic Search, Advanced Search, and Search History. The search options are displayed below the search box. The search options include "Search Modes and Expanders", "Limit your results", "Apply related words", "Also search within the full text of the articles", "Apply equivalent subjects", "Scholarly (Peer Reviewed) Journals", "Year Published", "Publication Type", and "Journal Title".

This page allows you to **search within particular fields**, or **several different fields at once**, by clicking on the **dropdown menu**, and **selecting the field** you wish to search within. Popular search fields include title and author. You can **add more fields** by clicking on the **+** sign.

Linking keywords in searches using AND, OR, NOT

AND, OR, NOT, Boolean operators, can be used **between keywords and phrases**.

		
<p>AND</p> <p>Results include both terms. Narrows down search.</p>	<p>OR</p> <p>Results include one term or another. Broadens search.</p>	<p>NOT</p> <p>Results include first term and not second. Narrows down search.</p>

AND between keywords and phrases will produce results which include both terms or phrases. This narrows down the search.

Subjects: Jesus Christ -- Parables; Bible . Mark 1-9; Greek language -- Terms and phrases

Periodical PDF Full Text (1830408 bytes)

Search tips: stop words are common words which the computer has been programmed to ignore, such as: the, of, or, been, however, so, and. Leave these out when searching. The search engine is **not case sensitive** so it does not matter if you use capital letters or not.

Search strategies

- Think about **keywords** and **related terms** linked to the topic you are looking for information on. **Plan your searches** and **keep brief notes** on your searches to avoid time-wasting repetition. Use a **thesaurus or dictionary** to help. There is a thesaurus on the ribbon at the top of the search screen. This can be used to browse the databases' subject thesaurus. You can select the terms in blue by ticking the box on the left, and 'add' them to the search box to search for them.

Details for Adam

Main Entry:
Ad·am /ádam/

Definition(s):
(in the Bible) the first man, created by God as the progenitor of the human race and the husband of Eve.

Subentry:
– phrases not know someone from Adam not know or be completely unable to recognize the person in question.

Word Origin:
– origin from Heb. 'ādām'man.'

Copyright:
Copyright © 2002 by Oxford University Press, Inc.

◀ Back Previous Record | Next Record ▶

- Think about how the **terms can be linked together** within the search using **AND, OR, NOT**.
- Use **related terms**, as required, when searching. If you get **too few results** you may need to **widen the search** by using a **broader term**. For example, if you search for 'Philemon' and get very few results, you could search for 'Pauline Epistle,' which will hopefully return more results. If your search returns **too many results**, which are **often irrelevant**, you may need to narrow it down by using a narrower term. For example, if you searched for 'heresy' and got too many results, try searching again for 'Arianism' and you will get fewer, more relevant results. A **thesaurus**, either in hardcopy or online, should help with identifying related terms and synonyms.
- Search for synonyms, e.g. death, deceased, passing, etc.
- **Alternative spellings**, such as, honor/honour, neighbor/neighbour, can be searched for using the wildcard **#**. For example, col#r, will find, color and colour.
- **Variations in root words**, prefixes, suffixes and plurals. For example, lead, mislead, leadership, leading, leader, leaders. **Wildcards** and **truncation** can be used if you want to **find all words related to the root word**. This is when you **use a symbol to replace letters at the end of, or in words**. In ATLA Databases **?** is used to **replace each unknown character**. For example, m?n finds references to man and men. **Truncation** is performed using ***** to **replace several consecutive characters**. For example, lead* would search for lead, leader, leaders, leadership, leading etc. Please note that wildcards and truncation cannot be combined for a single term in a search, e.g. p#ediatric* would be the same as a search for p* and would not be very useful. The symbol ***** can be used to match an unknown word in a phrase e.g. midsummer * dream.
- When a **singular word** is searched for, the **plural and possessive forms** will also be searched. However, if the **singular word** is enclosed in **quotation marks**, **only the singular word will be returned**. For instance, Gospel will return Gospel, Gospels, Gospel's. However, "Gospel" will only return Gospel.
- When a **plural term** is searched for, the search engine will **automatically search for the singular form** of the term. If the **plural is spelt differently** (e.g. child, children) the **search is not automatically expanded**.
- Think about **changes in place names**. For instance, Myanmar, Burma.

- It can be useful to search for a phrase as it makes your search more exact. A phrase is a series of words in the order entered, with no other words between. The phrase should be entered in quotation marks. For example, "Synoptic Gospels."
- To search for an article when you have more than one of the authors' names, separate them with AND. E.g. To search for a work by John Smith and Jane Jones, enter **Smith AND Jones** or **Smith John AND Jones Jane** or **John Smith AND Jane Jones**. The search phrase Smith Jones will not find the item: it will only retrieve items by authors named "Smith Jones" or "Jones Smith."
- Parentheses (brackets) can be used. Terms inside these are searched first.
- Near operator Ndigit E.g. N3 finds the words if they are within three words of one another regardless of the order they appear in - Miracles N3 Jesus.
- Within operator Wdigit E.g. W4 finds the words if they are within four words of one another in the order in which they were entered - Synoptic W4 Gospels.
